July 2022

Premier Club Members,

The Fourth of July is over and the neighborhood is starting to quiet down from all of the fireworks being shot off. Thank heavens! Now, it's the heat that is setting in. That means more watering of the flowers, garden and yard. It is nice to be getting some vegetables from the garden - lettuce, spinach, and green beans. I'm still waiting on cucumbers and zucchini. I know once I start harvesting these I'll be trying to find homes to give them away. My job now is to make sure that everything stays watered and healthy. (Darn bugs!)

Thanks to the i3 Bank team for speaking at our meeting in June. It's good to be able to ask them questions and to get caught up on all of the new offerings that the Bank has for us. If you do have any questions for them, please stop in and ask for answers. They are more than willing to help! Also, we are grateful to have them sponsor our group. So tell them "Thanks" the next time you happen to stop by.

Our next meeting will be Thursday, July 14 at 9:30 at St. John's Fellowship Hall. We will have a presentation about Glacier Creek Preserve. Those presenting will be Dr. Tom Bragg, Preserve Director, and Barbi Hayes. Glacier Creek Preserve is the land located on the northside of State Street at 148th Street. If you don't know what goes on there and have always wondered, be sure to come to the meeting to find out. It's good to know what is happening to the area around us. I know I've always wondered about it.

If you have travel/vacation plans in the near future, I hope all goes well. The reports about the airline cancellations and the high gas prices for road travel make you wonder if you need to reconsider sometimes. But there are some things we just have to go with. Enjoy whatever you do and make the most of it!

See you July 14!

Dee Clark
