

# Premier Club

Sponsored by

October 2022

Premier Club Members,

Harvesting has begun! The farmers are out in full force trying to get the crops into their bins or to their elevator of choice. It's always amazing how much ground those combines can cover these days. I remember when Dad had a corn picker that fit onto his tractor and only picked two rows at a time. I guess I'm really showing my age but it is truly something how things have progressed over the last "few" years.

Thanks to Dr. Terry Haack, Superintendent of Bennington Public Schools, for being our speaker in September. He did a good job of explaining the upcoming vote on the school bond that is being held in November. If you missed the presentation, you should have received information in the mail explaining the bond and the effects it will have. If you still have more questions, go to the school's website [https://www.benningtonschools.org/bond\\_issue](https://www.benningtonschools.org/bond_issue) There are several pages of information to help explain the school bond. If you still have questions, contact Dr. Haack. I'm sure he will be happy to help answer any of your concerns.

Our next meeting will be Thursday, October 13 at 9:30am at St. John's Lutheran Church Fellowship Hall. Our speaker will be Terry Glover. She is with the Alzheimer's Association and will be having a presentation called "Healthy Living for Brain and Body". This is a topic that will be informative for all of us. Please do your best to attend the meeting!

If you have any suggestions for upcoming meetings, please let me know. I want to have speakers/presentations that you are interested in hearing/learning about. I'm sure there are several things out there that I haven't even thought about having. Sometimes I need reminding what those are. Help me out if you can!

The frost is predicted to be on the pumpkin patch later this week! Make sure that you get all your vegetables picked and the flowers in or covered before they are gone until next year.

Take care,

***Dee Clark***
